Web

Requirements

Administrative Treatment Data

1.

Support publicly funded  
substance abuse and  
mental health services  
**[1-SAMHSA]**

2.

Target States that  
cannot buy or build their  
own Web system

3.

Reuse Web applications  
pioneered by leading States

4.

Upgrade to “Web  
Services” architecture

5.

“Open source” software  
to be reused by States,  
SAMHSA Programs, and  
behavioral health IT  
vendors

6.

Report Performance  
Partnership Grant (PPG)  
outcome measures

7.

Report GPRA data for all  
SAMHSA services  
programs

8.

Support National data  
standards

9.

Vertically integrate  
administrative data processing,  
starting from the clinic and  
going all the way up to  
SAMHSA

# SAMHSA INFORMATION MODEL

## Administrative Data

Level I

Populations/Communities Served

II

Feds: SAMHSA/DHHS/Others

III

State Performance Partners

IV

Service Providers

V

Frontline Professionals

VI

Treatment Clients

## 10. Horizontal integration:

- Each datum entered once, and only once, *in real time*
- Automate & link routine tasks for clinicians

11.

Track utilization &  
performance over time:  
encounters  
episodes, &  
outcomes

12.

Link services data among  
multiple State agencies

**[1-DHHS]**

13.

Minimize effort necessary  
to customize data  
collection instruments and  
information reports

14.

Support incremental  
system upgrades over time
