

Acknowledgments

The chapters in this collection developed out of an invitational Workshop on “Social Stressors, Personal and Social Resources and their Health Consequences” sponsored by the National Institute of Mental Health (NIMH) Office of Prevention and Special Projects, Bethesda, MD, August 17-19, 1995. Cooperating units from within the Department of Health and Human Services were many. They included:

- the National Institutes of Health’s (NIH) Office of Behavioral and Social Research
- the NIMH Office of Resource Management,
- the NIMH Office of Rural Mental Health Research
- the NIMH Office on AIDS
- the NIMH Behavioral, Cognitive and Social Processes Branch,
- the NIMH Prevention- and Basic Prevention and Behavioral Medicine- Branches
- the National Institute on Drug Abuse’s Division of Epidemiology and Prevention Research
- the National Heart, Lung and Blood Institute’s Behavioral Medicine Scientific Research Group
- the National Institute of Child Health and Human Development’s Center for Population Research
- the Communicable Disease Center’s National Institute of Occupational Safety and Health
- the Administration for Children and Families’ Office of Policy and Program Evaluation
- the Office of the Assistant Secretary for Planning and Evaluation
- the Office of the Assistant Secretary for Disease Prevention and Health Promotion.

We are grateful to many individuals who provided essential, detailed help in bringing about this publication. Particular thanks are due Leonard Pearlin, and Linda Gilpin for the major roles they played in putting together the Workshop, as well as Barbara Bruner, Mary Stoughton, Patricia Gibbons and Susan Milmoie, who guided various stages of the editing process, and staff of the NIMH Office of Science Information who expedited pieces of the editorial process. The units that recognized the potential usefulness of this publication in their program work and facilitated its distribution included: the Office of the Deputy Administrator of the Substance Abuse and Mental Health Services Administration, the NIH Office of Behavioral and Social Science Research, the NIH Prevention Office, and the NIH Fogarty International Center, with special thanks due the Mental Health Statistical Improvement Office of the SAMHSA Center on Mental Health Services.

The authors and their support staffs are also due special thanks, not only for the insightfulness of their material, but also for their patience and persistence during an extended publication process.
